

ROLLOTUBE 2

A very useful tool for topping down sections.

ACCESSORY FOR TRUNK FELLING

DESCRIPTION

Inserted in the gap behind the chain saw, the ROLLOTUBE prevents it from getting stuck. It then makes removing sections easier: just roll them on the stick.

The retractable tether can be attached to the harness, since it comes with a carabiner.

Retractable tether and rod available as spare parts.

TECHNICAL INFORMATION

Integrated retractable tether	resists up to 200 g (7.05 oz)
Nylon and Dyneema line	length 102 cm (40.15 in)
Yellow rod	covered fibreglass, 65 cm long (25.59 in)
